Re: Erosion Control Product Acceptability Lists for Multi-Model Applications (PAL)

Synopsis of Changes for April 2007

1. Western Excelsior –
 - Excel SR-1 All Natural interim approval in Class I A Urban
 - Excel RI All Natural interim approval in Class I A Urban
 - Excel S-2 All Natural interim approval in Class I B Urban
2. Erosion Control Blanket.com -
 - S31 BD interim approval in Class I Urban Type A
 - S32 BD interim approval in Class I Urban, Type B
 - SC32 BD interim approval in Class I Urban Type B
3. East Coat Erosion Blankets -
 - ECS – 2 approved in Class I, Type B
 - ECX – 1 approved in Class I, Type A
 - ECS – 1 approved in Class I, Type A
4. Verdylol –
 - V75S FD private label added to Class I Type A
 - V75S private label added to Class I Type A
 - V150S private label added to Class I Type B
 - V125C private label added to Class II Type B
5. Editorial Change to Class II mat definition adding language about minimum C factor.
6. Performance levels were modified by adding another significant digit.
7. C factor requirements added to the definitions of Urban mats to better illustrate requirements stated in main Class and Type definitions.
8. C factor requirement added to Class III definition.
9. Shear Stress requirements on all mats taken out to two decimal places.
10. Soil Stabilizer Type A had the word similar replaced with equal in the performance requirements.
11. Comments were added to the Class I blanket categories to better define the use of a higher class material in a lower category.

Sincerely,

Peter Kemp, P.E.
Chair, ECSW PAL Committee
